-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Murray, Jr..
3. Murray, Jr. et al. discloses a method of aligning that includes: two adapters **12** connected to two line generators **14a, 14b**; the method is performed as claimed as described in the specification of Murray, Jr.; since the device computes angles, it may be considered to be a “digital protractor”; all the calculations as claimed are either expressly or inherently made as shown in the chart at the bottom of column 13; and when the shafts are aligned, they will inherently have the same pitch, roll and azimuth as claimed.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Murray, Jr.

Art Unit: 2859

6. Murray, Jr. discloses the invention substantially as claimed. However, Murray, Jr. does not disclose the adapters with slots and grooves specifically as claimed. The courts have held that it is obvious to vary the shape of objects for the purpose of providing alternative mating surfaces for two objects [see *In re Dailey*, 149 USPQ 47 (CCPA 1976)]. Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to use *any* known mating surface for the laser and adapter of Murray, Jr. for the purpose of providing a means to connect the two components.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
